

When the "Last Spike" was driven in the first transcontinental railroad, the history of Southern Pacific began. Today Southern Pacific is one of the largest transportation systems in the United States. Our lines serve eight states in the West and South, and offer Four Great Routes for transcontinental travel, each route traversing a scenic region widely different from the others.

## DINNER

### THE MYSTERY OF TWO THERMOMETERS

TIME: THIS SUMMER  
PLACE: THE DESERT

**Y**OU ARE in the club car of one of Southern Pacific's transcontinental flyers. The train stops at a small desert station to take on water. A thermometer on the station platform ten feet away registers 90 degrees. But the thermometer in the club car registers only 75 degrees. Both are correct.

In this desert mystery, *air-conditioning* plays the leading part. This summer, club cars, lounge cars, dining cars, room cars (compartments—drawing rooms) and observation cars will be air-conditioned on our four finest trains to California—Golden State Limited, Sunset Limited, Overland Limited and Cascade.

Air-conditioned cars manufacture their own climate. Outside air is drawn in through filters, and its temperature and humidity are adjusted to just the right degree for greatest comfort. There is no extra charge for this convenience—*no extra fare on any Southern Pacific train.*

● Introducing a new service in which soup, salad, entrée, vegetable, bread and butter, beverage and dessert are included in the price of entrée.

**SOUTHERN PACIFIC**
